WEEKLY PLANNING FOR A FELLOW

Outpatient Clinics

• **General proctology clinic: daily**

- assessment and management of the full spectrum of anorectal diseases.
- office-based procedures including infrared coagulation, rubber band ligation, condyloma coagulation, skin tag excision, botulinum toxin injections, etc...

• **Proctology emergency clinic: daily**

- approximately 30 emergency consultations per day.
- hemorrhoidal thrombosis, anorectal abscesses, hemorrhage, acute proctitis, foreign bodies, postoperative complications, etc...

Functional Investigations

- **Anorectal manometry:** Wednesday & Friday
- **Endoanal ultrasound:** Monday, Tuesday & Thursday
- **High-Resolution Anoscopy (HRA):** Monday & Thursday
- **Pelvic imaging (Radiology Department)**
 - anoperineal MRI
 - dynamic pelvic MRI
 - recto-colpo-cystography

Operating Theatre

Approximately **20 procedures/day** under anesthesia performed in **two operating rooms**, including:

- Hemorrhoidal disease (excisional and minimally invasive techniques)
- Anal fissure (fissurectomy, lateral internal sphincterotomy, botulinum toxin injection)
- Anal fistulas (fistulotomy and sphincter-preserving procedures)
- Perianal Crohn's disease (conventional surgery and adipose tissue therapy)
- Pilonidal disease (excision, radiofrequency treatment and SiLaT)
- Hidradenitis suppurativa
- Anal condylomas
- Other benign anorectal disorders...

Multidisciplinary Meetings

Participation in multidisciplinary meetings, research meetings and teaching sessions according to the weekly schedule.
